

THCHIP

- ▷ Ultra-Coherent 14-Dendrite Bidirectional Fibonacci Sequence “Quantum Vagina” Neurons
- ▷ “Natural” Synthetic-Organic “Sunflower” Neural Network
- ▷ Energized by Quantum-Entangled Electron Pair/Pluralities

Mirror image is on the reverse side so it remains within the shadow of the obverse side neuron. This is so that the optional neodymium magnets that rest on each side encloses the entire neural network, so that the N/S magnetic flux lines intersect at 90 degrees to the substrate upon which the neural network is built, thereby creating a grid of dots where electrons passing thru are unlikely to go, which “golden swirl” architecture in concert with other things that might be going on, (Casimir effect, Lenz’s law, etc.) maintains coherence upon them.

Preliminary Information

== Organic “mix” applied to center of each self-scaling “aught” neuron using mini eye dropper, then dried.
